Light, Quick, and Agile. A maneuverable and pumpable board with strong surf roots. The flex of the board works synergistically with your trucks. While intended as a soulful and aggressive commuter board, this puppy can hold its own on a hill if carved hard and is light enough to be carried back up or just about anywhere. Perfect for commuting around town, bank, pool riding, parking garages, and of course pedestrian slalom. Made in the USA.

Comes in two flexes:

- Flex 1 (170-230+ lbs)
- Flex 2 (100-190+ lbs)
