Begining in 02/2003 Mauiline Longboards will be offering "Kit boards" that you can build yourself.

All you need to supply is epoxy resin, a few simple tools and a bit of know-how, and you can have a long life wood core fiberglass covered deck! The kits will include a 9 ply maple preshaped blank, Mauiline Longboards graphics, precut 4 Oz. fiberglass cloth, deck dust (for clear texture) and instructions

Kit prices should run about half of Mauiline's prebuilt customs, and will come with complete instructions. All options available on the prebuilts can be included in the kits. It's a great way to learn about board building and you get the satisfaction of riding something you built.

Look for updates on the Mauiline website.
