Darkwave productions, after some negative feedback on their last video, has come out with a new video filmed on a new camera with improved editing etc.... click read more to check it out.
The video is here: [Darkwave Productions](#).

It's a 3mb .wmv video.... Silverfish Longboarding does not have any control over the format of submitted videos so if you can't view it, feel free to post comments here and hopefully their next production will be in a more universal format (hint hint :))
