Classic 29 - 7 Time ASP World Champion Kelly Slater's favorite, Ebone's too. This is the commando of the Flexdex line, able to handle anything thrown its way. Probably the most widely ridden model since ANY age flexer can ride this board. The harder you ride this deck, the more energy it puts out! This is definitely the model if you want to rock n' roll through slow moving pedestrians, or pump and carve the smooth transitions of a skatepark or elementary school. Our goal with Kelly on his model was all about maneuverability and speed. Equivalent to a short board surfboard the Classic 29 is quick and snappy and pumps like a dream. Its the closest you'll get to shredding a wave, without actually getting in the water. Its the perfect board for days when there's no surf. It can rip around on the street, down alleys and off curbs, making every terrain perfect for this board. Its the ideal model for cruising to and from school, going from class to class, skating to the store or even to a party down the street. The Classic 29 is made with the same 1/4" Flexdex® material used on the original Kelly Slater design, but with brand new top of the line upgrades. The re-issued Classic 29's are built with ABEC5 FKD bearings, smooth 8" Unit fast-turning polished trucks, 1/2" risers, and Kryptonics 65mm wheels. Ebone gave the "go" on this combo after testing the new model in a "No Skateboarding" zone... the session ended running from security. Simply put, the Classic 29 is "one of the best boards I've ever owned…which hauls ass and rides as smooth as a Rolls Royce." by Dave Carnie at Big Brother Mag. BOOM.
