This board has a simple one color pirate on the bottom and the Pool King logo the top side.

Other: This is not just a wide board, it's what we call a "performance pig". This deck has all the features: deep concave, long, up-scooped nose and more of a "popsicle" overall look. It is large enough to handle the deepest of pools with plenty of comfort and stability. This is a well made deck and a real blast to rip around parks on.
