The first in our Cruizer series models. Comes as a complete with Bennett Truks (5.0 Vectors and 3dm Cambria Wheels in white, 90a duro or yellow 92a duro). Or you can set it up yourself if you're smart. This is a modernized version of the classic boards of the late 70's. Designed primarily for bank riding but you can blast an air, hit coping, or just bomb around your neighborhood; terrorizing the locals while avoiding the long arm of the law! The cross graphic is meant to be colored by you, the artist, to create a personalized model - two sharpies are included with the "complete" set up!
