The Fish is dead. Long live the Ceviche!

L : 33" WB" 22"-23"

With a built in vert-lam tail and a mellow nose, the Ceviche takes the best aspects of Loaded's Fish, dices it up and dishes out something brand new. Similar in deck length to the Fish, but with a shorter wheelbase, the Ceviche can be ridden between the trucks for pumping or off the tail for an aggressive, surfy feel.

The tail is a bit softer than a traditional street deck tails, allowing for rebound and responsiveness. While the board can be ollied and lends itself to many standard street skating tricks, tech tricks are not it's primary intention. Loose and agile, it's time to explore the limits of your sidewalk and hill thrashing abilities.

Multiple truck placements: Customize, salt, and lime to taste.

Wheel cut outs eliminate wheelbite (on most trucks).

Flex: One stiff but snappy flex to keep all riders happy.

Trucks: Designed to work with a variety of trucks. We recommend the Randal 150s and 125s, Paris 150s, Seismic 155s, Tracker RTS, Carver C7s and CXs 6.5"

Wheels: Designed around 70mm or smaller wheels, including Orangatang 4 Presidents.

Recipe included. Keep those tostadas handy.

Check out some Ceviche photos
