Abec11 Reflex "Compatible" Bushings

RELEASED!!!

The Mad Scientist has been crazy busy in his Huntington Beach skate laboratory as of late. His brain is working even faster than ever and now he never sleeps. He's been constantly designing, creating, and churning out new product. On the heels of the recent release of Retro Freerides and subLIME snotshots, he teamed up with Silverfish yet again to bring you skaters another exclusive. This time Chaput wants to stoke you out with his new Reflex "Compatible" Bushings!

The new Reflex "Compatibles" are available in sizes that fit your current favorite trucks (Randals, Paris, etc). They are made from the same Reflex Formula urethane found in the world's best wheels. With three different shapes and eight different durometers, you are given every opportunity to completely dial in your ride.

How do they perform you ask? At the IGSA's North American Downhill Championship in Vernon, Mischo Erban used these bushings in his Fyre trucks. He posted the top qualifying time against 100 other riders and then went on to win the race.

Before these bushings go on the Sk8Trip website for distribution everywhere, we are making them available to you at a killer price! Typically sold in sets of four at \$14.99, they are being offered here at Silverfish for a very limited time at \$14.99 where you buy one set of four and get another set of four FREE. Yep, that's right, eight bushings in any combination of shapes and durometers for less than 2 bucks each!

These will only be available on Silverfish for a limited time and the plan is to eventually make these in a different "non-compatible" size for exclusive use in the highly anticipated Liquid Trucks and Fyre Trucks. So get 'em while they're hot!
