

DURANGO

Durango Boards are born in the Colorado community of good times and creative people. We take pride in exposing local artists by showcasing their unique designs on our decks. Environment-friendly construction ensures that the only impact made is from the artwork. Our Canadian hard rock maple boards are cold-pressed at the source, then imprinted to create a true piece of art. durangoboard.com

EASTSIDE

Rain Wheels – 70mm / 78A – For better traction on wet pavement, these wheels are designed to reduce hydroplaning and increase grip in the rain. They are centerset for even wear and longevity. Vigorously tested and used by our racing crew in the Northwest, these wheels accelerate faster out of corners than larger wheels. The smaller size works great for commuter boards, too, keeping you low to the ground with superior control. eastsidelongboards.com

SEISMIC

The Seismic 69mm Hot Spots are renowned for high-performance grip-oriented skateboarding. In September, champion racer Michael Dong used them to smash his own world record in the technically demanding discipline of cyber slalom, one of the world's purest tests of wheel performance. Now the Hot Spots are available in two new sizes: The 63mm x 45mm Hot Spots in 80A orange, 84A sky blue, 88A deep purple and 92A black "smoke"; and the 66mm x 49mm Hot Spots in 79A orange, 82A sky blue, 85A deep purple and 88A black "smoke." As before, the 69mm x 51mm Hot Spots are available in 78A orange, 81A sky blue, 84A deep purple and 87A black "smoke." All Hot Spots are molded in Seismic's proprietary "Black Ops" translucent urethane, which delivers a breakthrough combination of grip and rebound. seismicskate.com

::::all SKATEBOARDS

::::all Skateboards is run out of a one-bedroom apartment in the East Village in New York City. It does not take for granted the city from which it emerged by using cityscape graphics and metropolitan clichés. Instead ::::all uses its hometown as inspiration to create expressive pieces on the highest quality seven-ply maple in the industry. The ::::all Skateboards team is committed to the community and core shops that support it. allskatenyc@gmail.com

EARTHWING

Working with engineers and chemists, Earthwing has developed a much faster "Purethane" formula. This formula is ridiculously fast and is exclusive to Superballs. There are absolutely no foreign materials, no pigments, no dyes or colors. This is an approach that most street wheels use and the approach Superballs slide wheels use. Available in 66mm, 70mm and 76mm from earthwing skateboards.com.

PURPLE SKUNK

The Grapey Apes are exclusive 3dm Avila wheels only available at the Purple Skunk. Diameter 75mm, width 65mm, hardness 72A. Smokes are Purple Skunk's signature wheel – smoky purple swirl in clear urethane. They have a soft formula and are an excellent multi-purpose wheel on all terrains. Diameter 62mm, width 40mm with a 78A durometer. Purple Ming is Lizzie's pick inspired by the Ming Dynasty exhibit that came to San Francisco's Asian Art Museum in 2008 – the words "Purple Skunk" translated into Ming Dynasty characters. Available in a variety of sizes and in four color combinations. purpleskunk.com

LOADED

With a built-in vert-lam tail and a mellow nose, the Ceviche takes the best aspects of the Fish, dices it up and dishes out something brand new. Similar in length to the Fish, but with a shorter wheelbase, the Ceviche can be ridden between the trucks for pumping or off the tail for an aggressive,

surfy feel. The tail is a bit softer than traditional street deck tails, allowing for rebound and responsiveness. While the board can be ollied and lends itself to many standard street skating tricks, tech tricks are not its primary intention. Loose and agile, it's time to explore the limits of your sidewalk and hill-thrashing abilities. loadedskateboards.com

DECOMPOSED

Working with the Lizzie Borden Bed & Breakfast where Lizzie wielded her axe, Decomposed has created this deck. lizzie-borden.com/GiftShop.aspx

POWELL-PERALTA

Some Powell Peralta decks will be arriving with our new K15 concave. K15 has a kicked nose with deeper, smoother concave, a longer wheelbase, a concave kick on nose and tail and a "scoop tail" for a more secure foot placement without feeling "trapped." This is a "big boy" version of our best-selling K12 concave, allowing all-terrain ripping with the stability of a longer wheelbase. The maximum wheel base is 15.75". The deck features a non-symmetrical nose to tail. You'll also get less wheelbite because the steeper concave goes out to the edge of the board. powell-peralta.com

LOTUS

Lotus Skate Designs has taken the FAST BACK 33 design and applied a brushed aluminum finish to our maple deck. The brushed aluminum finish allows us to apply custom grip tape designs for a unique finish. The board is a nice, lightweight board with some decent flex that provides the perfect size for an everyday rider. Drop us a note with your idea for a custom grip tape design. lotusskatedesigns.com

FURY

The new Fury EVO2 features 92A durometer premium urethane bushings with no break-in period required. Thermal polyurethane hard-shell caps pro-

vide control and stability. Fury EVO2 is equipped with Bones® Hard-Core Bushing™ technology [U.S. Patent No. 6,739,603] licensed from Skate One Corp. Combining strength and slickness, the new forged EVO2 baseplate features A356 aluminum heat-treated to 6061-T6 condition. In layman's terms, this means a lighter baseplate that can handle more abuse and slide better. furytruckcompany.com

GRAND PRIX

Grand Prix skateboards is proud to release the 55mm Micro wheel as part of their series of three-piece modular wheels. These 55mm wheels are produced in 99A durometer for the skateboard park riders. The rims come in an assortment of colors. Check grandprixskateboards.com for pricing.

BLACKKROSS

In what is surely a world's first, Spike the skateboarding iguana (and mascot for Concrete Wave Magazine) has been given his own pro model. The 7" x 20" Poket Spike features a shape that is highly reminiscent of an iguana's head. Spike's owner, Max Wettstein, was overjoyed when he heard the news and said he was very happy that it was a mini. blackkross.fr

HONEY

Honey Skateboards introduces the Rogue. This 38" long, 10" wide drop-through is concaved and cambered for that carving performance that Honeys are known for, and has a 4.75" tail for manuals and other tricks. Designed around a 180mm truck and 70mm wheels, the Rogue sits low and wide for a stable ride. The Rogue carves butter-smooth turns and is a pleasure to slide. honeyskateboards.com

SKATE GOD

Skate God marks the first skateboarding comic book. Inspired by the Skate God movie, which will be out next year, it's set in the post-apocalypse and is centered on Greek mythology and a skateboarder whose destiny is to save humanity. The comic was created by Al Garcia, who wrote the screenplay for the movie, and was illustrated by William Weigand, the storyboard film artist for Skate God. The comic will be released at this year's Comic Con. skategod.com

SK8KINGS

SK8KINGS is pleased to offer the new and hotly anticipated Chris Yandall Signature Deck. Designed to spec by '70s skate legend Chris Yandall, it is the first in the new DEX Series – featuring setups designed for conquering boardwalks, bike paths and all sorts of long-distance road riding. Perfectly sized at 9 3/4" x 35" (WB 23.25") and made from Canadian hard rock maple and Fibre Lam composites, the deck features wheel wells all around and a comfortable, flat platform to traverse the miles on. sk8kings.com

FLEXDEX

After succumbing to popular demand, Flexdex Skateboards creates its first drop-thru skateboard, the L37. Three generations of testing have resulted in this hard-carving drop-thru made from the same indestructible material all Flexdex inherit. The L37 is properly set up with reverse-kingpin downhill trucks and 70mm diameter plus wheels. Also keep a lookout for the rebirth of the preeminent Pro 60 longboard in January 2009. flexdex.com

SATURDAY SKATEBOARDS

Bill McRight, art director of Saturday Skateboards, explains his love affair with knives: "I have wanted to do a board with a dagger or some kind of knife for a really long time. I really like hand weapons and even spend time crafting crude homemade knives, so when we decided to do a long board I figured, 'You know, what's better than a knife? A sword.'" As Bill sees it, skateboarding is an aggressive activity that can be done alone or in a crew. "It's sort of like a gang or army, and you know, you gotta have weapons if you are in either of those." saturday skateboards.com

CALIFORNIA BONZING

The 8.5" x 34" De Stijl is California Bonzing Company's premiere board and the first convex longboard ever. The convex shape allows you to stay on the inside of the turn and was designed to Bonz the large hills but convenient and easy to carry around. De Stijl in Dutch means "the style" and is the name of a 1917 Dutch art movement from which the artwork on the board is inspired. californiabonzing.com

YATZ SPRAY WAX

Spray Wax is regular paraffin skate wax put in a can, and it works great for ledges and curbs. Spray it on instead of rubbing it on. It is also amazing on snow-

boards...like hot wax in a can! See a demo on YouTube or contact info@yatzco.com or call (330) 273-0011.

SMA

This year in order to distance our self from the pack, SMA has taken the step to make a production /custom. We will still be making the weave decks we helped invent but now we will offer hand-tinted models. Each deck is different with no two decks the same, as they are really hand done. Only the logo and the rider's name will be silkscreened on the deck. smaskateboards.com

TRIPLE 8

Inspired by Mitchie "Little Tricky" Brusco, Triple Eight offers a three-pack protective gear set for active youths that is designed to provide superior protection against high impact. Little Tricky pads are ergonomically fitted for superior comfort, as well as lightweight and breathable for decreased perspiration. triple8.com

HOSOI SKATES

Christian Hosoi is back and blasting again with style to spare – and Hosoi Skates' latest designs and deck shapes are as unique and stylish as ever. We are proud to feature the classic art of Mark Gonzales on the Gonz Hammerhead and an updated version of Sergie Ventura's original Trident shape. Hosoi Rockets wheels with their special formula go faster and last longer than your typical urethane and are guaranteed not to flatspot. hosois skates.com

TAY HUNT/BADLANDS

Now available is the legendary deck, with which Tay won the first ever pipe and bowl championship (Henry Hester Pro Bowl II) at the Upland Pipeline Skatepark. Yielding to a decade of encouragement from former Badlands skateboard enthusiasts, Tay and his dad (creator of the original Badlands/Pool Tool skateboards) have decided to return to the competition skateboard market after a 30 year hiatus. At present, two new, technically improved, versions of the original "Old School" decks, the Pro Hog and the re-designed Shredder, will be offered along with clothing, Badlands stickers and reproductions of the original Badlands poster. Old Pops (Tay's dad) has located 75 of the original posters (NOT reproductions), all individually autographed by Tay. These posters are being offered as collector's items. tayhuntskateboards.com
